Experience

Software Engineer	**Springworks**	**Nov 2021 – Present**

Remote, India
- Worked on a Business Management Software for a landscaping company. Mainly adding new features and revamping old feature.
- Migrated legacy codebase to new ReactJs version which increased performance and reduced build & development time.
- Migrated Javascript to Typescript which heavily reduced bugs.
- Introduced multiple other quality of life improvements like react-query, storybook and unit / integration testing. Which reduced development time and overall quality of the releases.
- Managed and mentored 5 interns over 3 years. Assigning tasks, reviewing estimates and provided technical guidance.

Software Engineer	**Techwarelab**	**Oct 2019 – Nov 2021**

Kochi, Kerala
- Independently architected and built Frontend for multiple web apps using ReactJs and Angular 2+. Built few cross plat form mobile apps using Ionic with Angular..
- Built web apps like Bus, Hotel & Flight booking. Food delivery. CRM for a medical equipment shop. Admin / Ads Manager portal for a social media.
- Migrated existing legacy projects to ReactJs to imrpove performance, scalability and maintainability.
- Worked with Alibaba engineering team to build a bus booking web app.
- Managed two interns and guided them through ReactJs and it's ecosystems.
